

ESA-SPECIFIC RESTRICTIONS

PRODUCT	ACTIVE INGREDIENT	READ THE LABEL	MAXIMUM SPRAY DRIFT BUFFER GROUND / AERIAL	MITIGATION POINTS FOR RUNOFF/EROSION (outside a PULA) ¹
Liberty Ultra	L-glufosinate		10 ft. / 50 ft.	3
Enlist One ²	2,4-D choline		30 ft. / not allowed	4 or 6 credits ³
Enlist Duo ²	2,4-D choline & glyphosate		30 ft. / not allowed	4 or 6 credits ³
Engenia	dicamba (BAPMA salt)		240 ft. / not allowed	3
Stryax	dicamba (DGA salt)		240 ft. / not allowed	3
Tavium	dicamba (DGA salt) & S-metolachlor		240 ft. / not allowed	3

¹Always check Bulletins Live! Two to see if your spray location falls within a “pesticide use limitation area” or PULA, which may increase the required mitigation points.

²These products were registered before the release of EPA’s formalized ESA Herbicide Strategy, so their descriptions of ESA mitigations are different from labels now moving through the registration process.

³These terms (“credits”) only appear in the Enlist registrations; see previous footnote.
